experience

Meta Staff Software Engineer · New York, NY — Sep 2020 – Present

Meta Superintelligence Labs
Voice & Embodiment
Dec 2024 – Present

- Android lead for Muse voice, real-time calls with live AI avatars over WebRTC, from the Connect 2026 demo through launch.
- Built 0-to-1 AI voice and avatar calling for Facebook, Instagram, and Messenger on Android and iOS, syncing live audio, video, and captions.
- Set technical direction for rollout, experimentation, and call-quality metrics shared across eng, product, and data science.
- Turned prototypes into company-wide tests within days, including a one-week Android port of avatar calling.

Facebook Video
Reels Consumption Growth
Dec 2021 – Nov 2024

- Android tech lead; my launches drove 50–100%+ of team goals.
- Shipped Reels autoplay in Feed after fixing crash, memory, and scroll regressions: +3.8% watch time, +25M daily viewers.
- Delivered Reels in the Watch tab on Android from concept to public test in seven weeks; the launch grew Reels watch time 2.3%.
- Beat the H2 2024 goal by 93% after staffing fell by two-thirds.

Reality Labs
Facebook App on Wearables
Sep 2020 – Nov 2021

- Owned Stories sharing on unreleased wearable hardware across five partner teams on fixed deadlines; rated second best in UX validation.
- Built the first end-to-end and UI tests, raising coverage from 0% to 80%.
- Stepped up as tech lead and PM when the team was understaffed.

Facebook
Software Engineering Intern
Menlo Park, CA
Summer 2019

- Determined optimal budgets and durations for lightweight ads to hit business outcomes (Python, SQL).
- Surfaced ad recommendations to millions of advertisers (PHP, React.js).
- Partnered with design, content strategy, and data engineering, and refactored the ads codebase.

Central de Ofertas
Full Stack Software Development Intern
Buenos Aires, Argentina
Summer 2018

- Built a full-stack price comparison web app for staff and sellers (Node.js, MongoDB, Material Design).
- Automated MySQL data loading with JavaScript scripts.

projects

Church App
iOS Developer + Project Lead
2023

- Built an iOS app for my church in Swift, from design through launch.
- Led non-engineer volunteers through scoping, content, and testing.

education

Princeton University
A.B. Computer Science
GPA 3.64, Spring 2020

Certificates in Finance and Spanish. Projects: Dance Studio (3D choreography tool), TigerMeals (founder).

skills

Kotlin, Java (6+ yrs)
Swift, Objective-C (1+ yr)
Hack, Python, SQL

Android SDK, Jetpack Compose, iOS, WebRTC, GraphQL, React, Git, A/B testing, AI agents

English native
Spanish fluent
Mandarin intermediate
Graphic Design

leadership

Christians@MetaNY
NY Area Lead
Leads weekly Bible studies and monthly lunches

Mentor + Intern Manager
to 15 engineers and interns

Alabaster Group (Church)
Tech Lead, AV Team

Interests basketball, cinema, coffee, ceramics, travel, Asian cuisine
